PAUL KENRICK. Alternation of generations in land plants: new phylogenetic and palaeobotanical evidence 293
E. SHEFFIELD. Alternation of generations in ferns: mechanisms and significance 331
RICHARD M. BATEMAN & WILLIAMS A. DIMICHELE. Heterospory: the most iterative key innovation in the evolutionary history of the plant kingdom 345
H. G. DICKINSON. The regulation of alternation of generation in flower plants 419

NO. 4, NOVEMBER 1994

A. W. F. EDWARDS. The fundamental theorem of natural selection . . . 443
PETER W. BARLOW. Rhythm, periodicity and polarity as bases for morphogenesis in plants 475
RICHARD M. BATEMAN. Evolutionary-developmental change in the growth architecture of fossil rhizomorphic lycopsids: scenarios constructed on cladistic foundations 527
MOSHE WOLF & YEHUDAH L. WERNER. The striped colour pattern and striped/non-striped polymorphism in snakes (Reptilia: Ophidia) 599

INDEX OF AUTHORS

BARLOW, P. W. Rhythm, periodicity and polarity as bases for morphogenesis in plants 475
BATEMAN, R. Evolutionary-developmental change in the growth architecture of fossil rhizomorphic lycopsids: scenarios constructed in cladistic foundations 527
BATEMAN, R. M. & DIMICHELE, W. A. Heterospory: the most iterative key innovation in the evolutionary history of the plant kingdom . . . 345
BELL, P. R. Introduction to special issue 'The regulation of alternation of generation in flowering plants'. 259
DICKINSON, H. G. The regulation of alternation of generation in flowering plants 419
EDWARDS, A. W. F. The fundamental theorem of natural selection . . . 443
HEMSLEY, A. R. The origin of the land plant sporophyte: an interpolational scenario 263
HEYES, C. M. Social learning in animals: categories and mechanisms . . 207
JOHN, D. M. Alternation of generations in algae: its complexity, maintenance and evolution 275
KENRICK, P. Alternation of generations in land plants: new phylogenetic and palaeobotanical evidence 293
